VanBrain

Check what fits your tool

Workshop worksheet

Use a tool switched off and disconnected, or a clear photo of its rating plate.

Copy the details from the tool label

Include letters at the end of the model. Record the type if the label shows one.

Brand

Model

Type or version

Check the manufacturer’s guidance

Match the consumable to the tool and the material you’re working with.

Job and material

Consumable name and exact part number

Fitting detail to confirm, such as bore size or mount

Manufacturer’s reference or manual page

If the fit is unclear, ask your tutor or the manufacturer before fitting.

Check which models VanBrain lists

Search for the model online. You can use the lookup without installing the app.
